Mr. Will Partin
CFA
160 Nanzetta Way
Lewisville, NC 27023

Mr. Partin,

I just wanted to drop you a line and say thank you for our service.

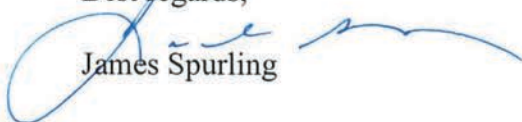

The BioShield 75 application that you applied in the locker room, player's weight room and the sports medicine facility was very effective. We have not had any indication of any problems of Staph, or MRSA with any athletes that use the facilities.

The odor that normally comes with the use of athletes in the locker room has been reduced very much with the application of BioShield 75. We are very happy with these results for our athletes as well as our staff that uses the facility daily.

I would recommend this product to any athletic facility where people are working out or showering in groups of 3 or more. As you are aware we have as many as 135, 3 times a day!

I look forward in having your company return in the near future, for our second application and treatment of our facility.

Best regards,

James Spurling

Director of Kenan Football Center
